REMARKS

This is UNEVALUATED
Information

Between 17 October 1953 and 7 March 1954, the following 2 types of jet aircraft were observed flying over Jaworzno (5013 N/1916 E):

MIG-15 with swept-back wings, air intake in front, elevator assembly fitted high on rudder assembly. Aircraft with a fuselage similar to that of the MiG-15. Wings fitted vertical to fuselage. Longish bulges at wing tips, not under the wings. No air intake aperture was observed.

Aircraft of the two types approached from and headed toward Krakow (5004 N/1956 E).

25X1

25X1

Comment. The two aircraft types were previously observed with the Polish fighter division stationed in the Krakow-Zendek area. One aircraft type was recognized as a MiG-15 by source, while the other type is probably a Yak-23.
